

Hdpetanks

Our extensive range of High Quality Polyethylene tanks are manufactured in the UK.

Designed to be used in a wide range of applications i.e., Pump Stations, Rainwater Harvesting, Sewage and Water Storage applications, these tanks can easily be adapted for use in other industries for bulk liquid and various agricultural storage applications.

Manufactured from high density polyethylene all tanks are extremely robust but comparatively lightweight.

They are designed to be installed above or below ground.

All tanks have optional access sizes and above ground tanks can be fitted with two optional sizes of screwed access covers, either 300 or 450mm, if required

The range features one piece moulded tanks in volumes from 300 litres to 6000 litres and with the addition of the Stormpod modular storage system, which is ideal for large volume storage and attenuation any storage capacity is achievable.

For special orders the tanks can be manufactured in various colours to match corporate livery.

All tanks are supported by a 50 year design life warranty.

Features and Benefits

- Single piece rotationally moulded HDPE sump
- Material - High density, low melt index hexane polyethylene
- High stiffness and hardness
- Excellent impact strength
- UV10 stabilised
- 8 no. 470 x 400mm flat faces to engage pipe connections
- Can accommodate Ø450 and 600 x 600mm free access openings/cover and frames
